

## Cereus Setup

### PokerHound Quick Start for Cereus

---

#### **Cereus Site Setup:**

- Dealer Messages: Everything
- Hand History: Set to save
- Table Theme to **Top View**
- Table Size to **Default** (other sizes will be supported for real-time cards in future updates)

#### **PH Setup:**

- Set UB & AP Player Names in Screen Names (PH sets them to upper case, to match Cereus)
- Set AP and UB Hand History locations to match folders used by UB & AP
- Set Preferred Seating to match Cereus (PH requires same preferred seating on both UB & AP)
- Make sure overlay is not covering your up-cards. To scrape them, PH must be able to see them on your screen.
