

PokerHound / PH_Stars Quick Start for Vista - 64

PokerHound V 3.55.3+

Download Link: http://www.insight-pokerhound.com/PokerHound_V3_Install.exe

PH_Stars Version 2.00.6+

Download Link: http://www.insight-pokerhound.com/PH_Stars_V2_Install.exe

Preliminary system settings:

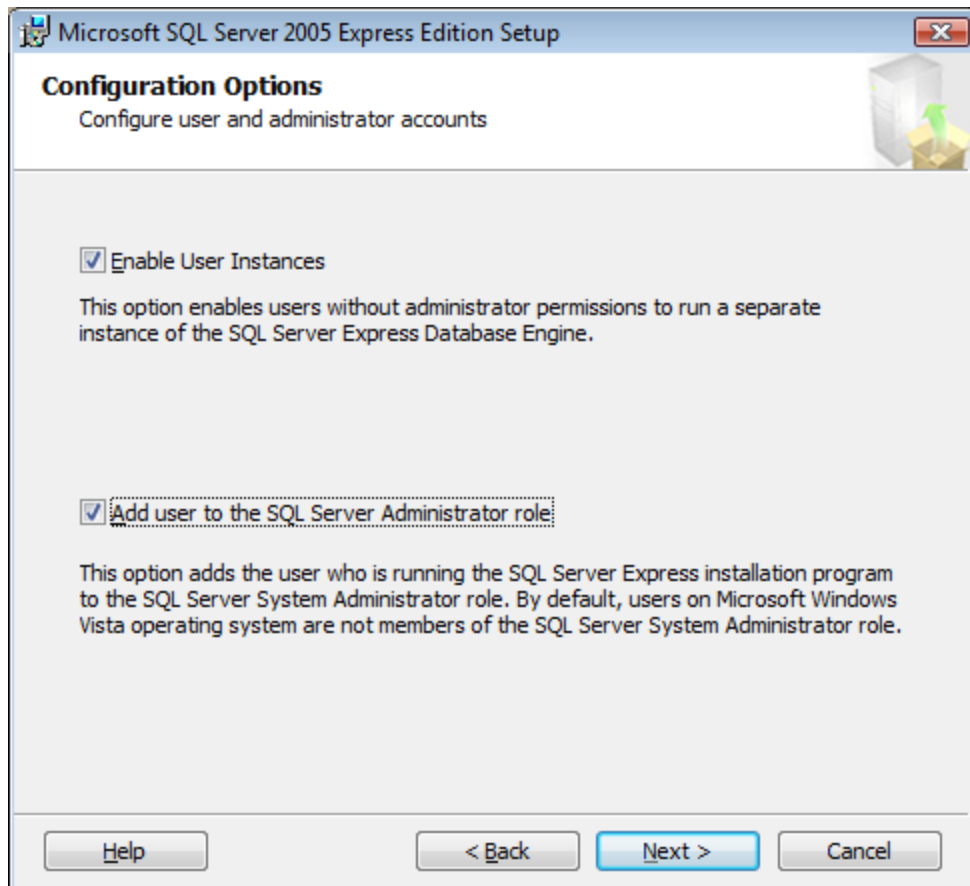

1. **Turn OFF Aero mode** (Aero creates multiple handles to windows, making it impossible for PH to track the game tables)
2. **Turn ON User account control.** You need it ON to set exe's in properties to run as admin. After exe's have been set, you can turn it off again, if desired.
3. **Set display to high 32 Bit** (It most likely is at this setting by default.)

Install and Setup:

1. **Pre-Install V-64 version of SQL Express** (Uninstall old versions, if any)

Download Link: <http://go.microsoft.com/fwlink/?linkid=83387>

Use Default settings, except on this screen check both options

2. Download and save PH installer
3. Run PH installer
4. Set Vista User Security - User account privileges on Program Folder - All Exe to Admin
5. Start PH and set Data storage location
6. Set Folder security for Hand History save folder
7. Set PH - Options - Screen Names - Hand History save location - Preferred Seating
8. Check Poker Site settings
9. Open Play money table and test setup

Note: This process only needs to be done on initial install. Your system will remember the settings for subsequent installs.

Poker Stars

1. Install English version preferably to default location
2. Set Hand History Save location
3. Set Deck to Standard
4. Enter player name in PH options exactly as on Stars
4. Set preferred seating in PH to match Stars

Full Tilt

1. Install English version preferably to default location
2. Set Hand History Save location
3. Set Dealer Messages to Everything
4. Enter player name in PH options exactly as on FT
5. Set preferred seating in PH to match FT

iPoker

1. Install English version preferably to default location
2. Set chat and table options

Party Poker

1. Install English version to default location
2. Install FPHG, set folder security, **and set to XP emulation**
Download Link: http://www.insight-pokerhound.com/FreePHG_Install.exe
3. Enter player name in PH options exactly as on Party
4. Set preferred seating in PH to match Party

Typical PH Option settings:

Note: If you are cascading tables, do NOT check "Always Show HUD"
